

ASYMMETRIC SPRING HOOK

Our stainless steel Asymmetric Spring Hook is made from the best materials available and guarantees long lasting performance. The eyelet ensures that the spring hook is securely attached to whatever application you are using it for. This spring hook offers an efficient and reliable solution where its asymmetric design means that it can be put into use quickly, making life easier with no hassle. Tested and Certified to AS 4991 Lifting Devices. Also they are individually marked with a serial number.
