

Mechanical Steel Jack

- Double pawl brake system for quick braking, safe and reliable
- Low gearing tolerance for smooth transmissions, free of jerks
- High efficiency and minimum turning force
- Less than 25kgs is required to lift full load
- Sturdy, light weight and quick lift performance
- CRS plate, carbonised alloy steel gears

Easy Operating Instructions: Place the steel jack on even ground. Next, place the goods on the Lower Support Stand or the Upper Support Stand. Turn the Level clockwise to lift the goods, and anti-clockwise to lower the goods.

Part No.	WLL (t)	Load Height	Lifting Height	Min. Claw Height	Weight (kg)
10MJ015	1.5	725	350	70	13
10MJ030	3	725	350	75	20
10MJ050	5	725	300	70	27
